

Austin American Technology Strengthens Operations with Strategic Team Expansion

Austin, TX – July 2026 – Austin American Technology (AAT) is continuing to expand its team as the company grows its manufacturing capabilities and prepares to support increasing demand for its industry-leading PCB cleaning solutions. The company has recently added five new team members across key areas of the business, including accounting, manufacturing, purchasing, fabrication, and engineering.

The new additions include Damon Hunkins as Accounting Manager, Caleb Dollarhide as Manufacturing Lead/Supervisor, Darren Barnes as Purchasing Specialist, Daniel Caballero as Plastic Welder/Fabricator, and Halle Steinke as Lead CAD Designer.

“These new team members bring valuable experience and strengthen several areas of our business as we continue to grow,” said Todd Rountree, CEO of Austin American Technology. “Having the right people in place allows us to increase our production capabilities, improve efficiency, and continue providing the level of support our customers expect.”

The expansion follows AAT’s recent growth initiatives, including the successful integration of Aqua Klean Systems and a threefold increase in inline cleaner production capacity. By combining decades of cleaning technology expertise with an expanded manufacturing team, AAT is positioned to better support customers with shorter lead times, increased production capacity, and advanced cleaning solutions for today’s demanding electronics manufacturing environments.

The company’s expanded team will support continued development and production of AAT’s portfolio of batch cleaners, inline cleaners, solvent cleaners, and stencil cleaning systems. All AAT cleaning systems are engineered and manufactured at the company’s Austin, Texas facility and are customized to

meet the unique process requirements of customers across industries including automotive, medical, military, and aerospace.

With continued investment in its people, manufacturing capabilities, and technology, Austin American Technology is prepared to support the evolving needs of electronics manufacturers while maintaining the quality and service that have defined the company for more than 40 years.

About Austin American Technology:

Austin American Technology is on the forefront of engineering and manufacturing high performance cleaning system for over 35 years, delivering solutions worldwide. AAT was founded in 1986, as a provider of SMT rework systems and process engineering testing services. In 1988, their focus shifted toward the high-end electronics cleaning segment with the introduction of the world's first automated stencil cleaner. In 2000, Austin American Technology became a market leader in inline cleaning systems with the introduction of the award-winning [HydroJet®](#) series. Patented cleaning and drying technologies were incorporated into an energy and space-efficient format to set new standards for performance and low cost of ownership. Building on this success, AAT introduced the [MicroJet®](#) inline flip chip cleaner to provide high volume cleaning capability in a small footprint. In 2013 AAT introduced the world's smallest most efficient inline cleaner, the [NanoJet®](#). Austin American Technology merged with Aqua Klean Systems in 2024, creating the largest full line manufacturer in North America.
