Split Vision INTRUDER from APE Provides Complete BGA Workstation

Key Largo, Florida - Automated Production Equipment, or A.P.E, announces the availability of the INTRUDER, a complete, advanced hot air BGA rework station with split vision placement/removal capability, supplied with its own separate computer (control) station, for under \$25K USD.

“INTRUDER is the only US-made complete BGA Rework system with its own computer station for under \$25K,” states Casey Scheu, CEO. “It’s actually the lowest cost USA-manufactured rework station with its own integral split vision placement and removal capability priced as low as \$20K,” he adds. “Plus, all INTRUDER systems supplied include installation and ongoing training.” APE will also exhibit their rework systems at the upcoming Del Mar Electronics show, DMEMS 2026, April 22 & 23, 2026, in San Diego, California in **Booth #707**.

About APE

With more than 50 years’ experience, APE.com has earned a reputation as the industry standard for industrial electronics rework. APE’s products are constructed in the USA with ease of use and durability as key construction features. For more information, or to contact the company, visit www.APE.com.
