Accu-Assembly's Smart Storage Solution, AccuLiFT™, Recognized as 2025 Mexico Technology Award Winner

NORTH READING, MA — September 2025 — Accu-Assembly Inc., a leading industrial automation company, is proud to announce that its groundbreaking AccuLiFT™ Vertical Lift Module (VLM) has received the 2025 Mexico Technology Award in the Component Storage – Automated Systems category. The award was presented during a ceremony held at SMTA Guadalajara 2025.

The AccuLiFT™ is specifically engineered to optimize storage and handling of SMT component reels. With a vertical design that can reach up to 16.8 feet (5.1 meters) in height, the system can securely hold up to 8,000 small reels (7-inch diameter), maximizing storage density without consuming additional valuable floor space.

Key features of the AccuLiFT™ include:

- **Flexible Storage Configuration:** The patented pallet system enables rapid reconfiguration to accommodate various reel sizes and tape thicknesses, ensuring adaptability to changing production demands.
- **Automated Loading and Unloading:** A purpose-built robotic system automates reel handling, minimizing manual labor, reducing errors, and improving throughput.
- **Made in the USA:** Proudly designed and manufactured in the United States, the AccuLiFT™ delivers industrial-grade quality and reliability for demanding manufacturing environments.

"We are honored to receive the 2025 Mexico Technology Award for the AccuLiFT™ system," said Michael Kou, Owner, Accu-Assembly. "This award validates our dedication to providing smart, space-efficient, and automated solutions that help manufacturers improve productivity and reduce costs. The AccuLiFT™ is designed to address the unique challenges of component storage and streamline SMT production workflows."

The Mexico Technology Awards recognize the most recent technological innovations in Mexico's manufacturing landscape, spotlighting achievements by OEM manufacturing equipment and materials suppliers over the past year.
