Anda Opens Korea Technology Center, Strengthening Regional Support and Technical Capabilities

FREMONT, CALIFORNIA — April 2026 — Anda Technologies, a leading provider of fluid application and custom automated manufacturing equipment, proudly announced the successful opening of its new Korea Technology Center during an Open House event held on March 30, 2026, in Gyeonggi-do, South Korea. The event welcomed customers, partners, and industry professionals to experience the company's expanded technical capabilities and enhanced regional support infrastructure.

The new facility represents a strategic investment in East Asia and underscores Anda's commitment to supporting customers in South Korea and the broader region with advanced application expertise, faster

response times, and localized technical resources. The Korea Technology Center features a fully equipped application laboratory and demonstration facility, showcasing Anda's complete dispensing and conformal coating solutions, including its OMO (One Man Operation) line. The center also integrates plasma surface treatment systems, curing ovens, material storage, and a dedicated spare parts inventory to ensure rapid service and support.

Designed to meet the evolving needs of electronics manufacturers, the facility enables hands-on equipment demonstrations, process validation, and technical training. With in-house experts and certified trainers on-site, customers can access comprehensive support for equipment operation, process optimization, and production readiness.

“This expansion reflects our ongoing commitment to being closer to our customers and providing the tools, expertise, and responsiveness they need to succeed,” said Abby Tsoi, CEO of Anda. “By strengthening our presence in South Korea, we are better positioned to support the region’s growing demand for advanced dispensing and coating technologies.”

Anda also recognized the contributions of its Asia Pacific team and its distribution partner, JS Tech, whose collaboration played a key role in bringing the Korea Technology Center to life.

The opening of the Korea Technology Center marks an important milestone in Anda’s continued global expansion and reinforces its position as a trusted partner in delivering high-performance manufacturing solutions.

About Anda Automation:

Founded in 1999, Anda Automation has its headquarters in Dongguan, China, and is publicly listed on the Shanghai Stock Exchange. Anda specializes in manufacturing automated smart factory equipment and offers vertical integration of research and development, manufacturing, sales, and service for fluid applications and intelligent automation systems.

As a world-leading smart manufacturer of fluid control equipment, Anda possesses unique technologies related to developing and producing high-precision dispensers, coating machines, UV and thermal curing ovens, and plasma cleaning equipment. Anda is dedicated to ensuring global customer satisfaction by offering a comprehensive range of smart manufacturing solutions.

The company also has offices in California (USA), Guadalajara (Mexico), Penang (Malaysia), Hong Kong, India, Vietnam, Japan, Shenzhen, Suzhou, and Changsha (China), as well as 20 service centers worldwide. Anda develops high-precision dispensing and coating valves, linear motors, servo linear guides, polymer mineral casting, and optical assembly equipment.
