See Inspection in a New Light: Aven Bringing MicroVue™ 2.0 to SMTA Ontario Expo

ANN ARBOR, MI — May 2026 — Aven Tools, a trusted provider of precision tools and inspection solutions, will exhibit at the SMTA Ontario Expo & Tech Forum 2026 on Tuesday, June 16, 2026, at Venu Event Space in Vaughan, Ontario, Canada.

At the event, Aven will showcase its MicroVue 2.0 All-In-One Digital Microscope, giving attendees a chance to get hands-on with a system built for real-world inspection, rework, and quality control.

Designed for PCB inspection, solder joint evaluation, and component analysis, MicroVue 2.0 delivers high-resolution imaging in a compact, all-in-one setup. The built-in 13.3-inch HD monitor eliminates the need for external screens or eyepieces, making it easier to use and easier on operators during long inspection sessions.

The system also includes a magnetic ring light with interchangeable 365nm UV lighting and sector control, helping bring out defects, contamination, and fine surface details that can otherwise be hard to spot. With extended working distance, fine focus control, and integrated software for image capture and measurement, it's a practical tool for both production floors and lab environments.

Aven's focus with MicroVue 2.0 is simple: make inspection clearer, faster, and more consistent without adding complexity.

If you'll be at the show, stop by and see it for yourself—visit Aven at the SMTA Ontario Expo & Tech Forum and take MicroVue 2.0 for a test drive.
