CE3S and Desco Industries Announce May 2026 ANSI/ESD S20.20-2021 Certification Webinar Series

HARRISBURG, PA — February 2026 — Cumberland Electronics Strategic Supply Solutions (CE3S), your strategic sourcing, professional solutions and distribution partner, is pleased to announce the upcoming **ANSI/ESD S20.20-2021 Training Course** hosted by Desco Industries Inc., taking place throughout May 2026. This comprehensive four-part webinar series is designed to help ESD professionals and manufacturing teams implement, verify, and maintain effective ESD control programs aligned with the globally recognized ANSI/ESD S20.20-2021 standard.

The live online training will be held from **1-3 PM EDT** on the following dates:

- **Tuesday, May 5, 2026** – ESD Basics/Technical and Administrative Review of S20.20-2021 Grounding/Personnel
- **Tuesday, May 12, 2026** – Grounding-Wrist Straps/Continuous Monitoring/Flooring-Personnel Grounding
- **Tuesday, May 19, 2026** – Worksurfaces/Mobile Equipment/Shelving/Seating
- **Tuesday, May 26, 2026** – Packaging/Ionization//Garments/Gloves/Finger Cots

Participants who register will automatically be enrolled in all four sessions and will receive a certificate recognizing completion of the Desco Industries Inc ANSI/ESD S20.20-2021 Training Course upon successful completion of the program and related exams.

Building a Strong Foundation in ESD Control

Electrostatic discharge (ESD) remains a critical risk factor for electronics manufacturers worldwide. An effective ESD control program requires leadership commitment, structured processes, and a clear understanding of how static electricity is generated and controlled. Focused training and organization are key components to achieving a sustainable ESD program from management through the operator level.

This course is particularly valuable for individuals new to ESD program implementation and management, as well as experienced professionals seeking a stronger understanding of the administrative and technical requirements of the S20.20-2021 standard.

The training emphasizes both theoretical understanding and practical application, ensuring attendees can confidently manage ESD control items and maintain compliance across their facilities.

Proven Value for Manufacturing Teams

Past attendees consistently praise the program for its clarity and depth.

“Thank you for putting on this training. I’ve been a part of our ESD program for over a decade with no real training, just picking up on things over time. It all makes so much more sense now to the point of being able to explain and teach others.”

— Jennifer Simmerman, Quality Assurance Group Leader, RBB, Wooster, Ohio

“Desco and SCS are what any organization would desire as their partner in ESD training and static control products... This training covers all necessary topics needed to help your business build a comprehensive ESD control program, certify your staff, and support your specific needs.”

— S. R. Cooper, ESD Coordinator, MicroSat Systems Canada Inc.

Registration Information

Registration is open through **Tuesday, April 28, 2026**. To secure your spot, [Register Here](#).
