## CE3S Brings Back Free ANSI/ESD S20.20 Training Series This August with Desco Industries

**HARRISBURG, PA — June 2026 —** Cumberland Electronics Strategic Supply Solutions (CE3S), your strategic sourcing, professional solutions and distribution partner, in partnership with Desco Industries Inc., will host its next free ANSI/ESD S20.20 training series throughout August 2026, offering a practical, easy-to-follow introduction to one of the industry's most widely used ESD control standards.

Designed for ESD coordinators, engineers, quality professionals and anyone involved in static control programs, the four-part webinar series walks through the fundamentals of ANSI/ESD S20.20-2021 and what it really takes to build and maintain an effective program. It's especially useful for those who have been "learning as they go" and want a clearer, more structured understanding of best practices.

The course covers both the technical and administrative aspects of the standard, along with real-world guidance on implementing and verifying ESD controls across a facility. Topics include ESD basics, grounding, personnel grounding, worksurfaces, flooring, ionization, packaging and more. Participants who complete all sessions and related exams will receive a certificate of completion.

The training will be held as a four-part webinar series:

- Tuesday, August 4, 2026 | 1:00–3:00 PM EDT
- Tuesday, August 11, 2026 | 1:00–3:00 PM EDT
- Tuesday, August 18, 2026 | 1:00–3:00 PM EDT
- Tuesday, August 25, 2026 | 1:00–3:00 PM EDT

Attendees are automatically registered for all four sessions.

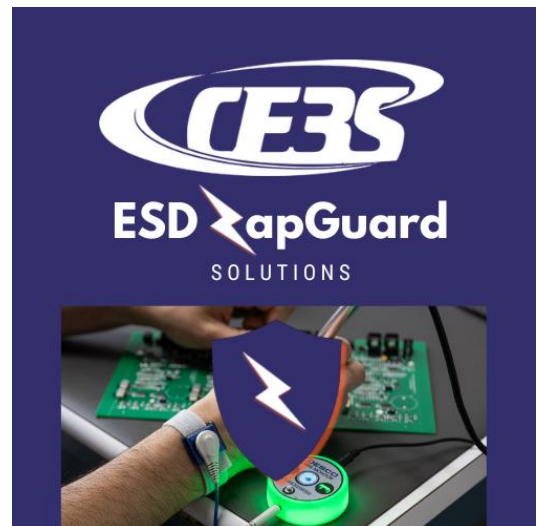

Rather than focusing only on theory, the series emphasizes practical application—how to select the right ESD control items, how to verify compliance, and how to build a program that actually works day-to-day on the production floor.

Registration is free, but space is limited and closes July 28.

To reserve your spot, register here:
