## CE3S Partners with Protektive Pak to Deliver Industry-Leading ESD Protection Solutions Featuring ENDURA-TEK™

**HARRISBURG, PA — January 2025** — Cumberland Electronics Strategic Supply Solutions (CE3S), your strategic sourcing, professional solutions and distribution partner, is proud to announce its partnership with Protektive Pak, a trusted leader in static-safe packaging and handling products. This collaboration enables CE3S to offer Protektive Pak's innovative product line, with a spotlight on the groundbreaking ENDURA-TEK™, the ultimate extruded ESD material designed to provide superior protection and durability.

Engineered with a high-impact polypropylene honeycomb structure, ENDURA-TEK™ offers exceptional strength and longevity, outperforming traditional I-fluted materials. Its advanced design ensures reliable protection for static-sensitive products, whether stored, transported, or handled within or outside ESD Protected Areas (EPAs).

### ENDURA-TEK™ Product Highlights:

- **Open Bin Boxes:** Provide organized storage and quick access to components with robust protection, easily integrating into existing systems.
- **Storage Containers:** Ideal for storing and transporting sensitive items safely, featuring a steel-reinforced frame and rolled-over side construction for double-thickness durability.
- **Tek-Trays:** Versatile for assembly and storage, these stackable trays save workspace and improve productivity while offering reinforced durability for long-term use.

Protektive Pak's Conductive extruded honeycomb polypropylene, Endura-Tek material meets ANSI/ESD S20.20 and Packaging Standard ANSI/ESD S541. The material is rigorously tested per ANSI/ESD STM11.11 ensuring compliance and reliable ESD protection for electronics.

The electronics industry faces significant challenges in protecting static-sensitive products during transportation or storage outside EPAs. Circuit boards and assemblies are at risk of both ESD and physical damage during internal facility movement or subcontractor shipping. Protektive Pak's solutions address these challenges head-on, offering a durable, cost-effective way to safeguard components.

“We’re excited to partner with Protektive Pak to offer their innovative ENDURA-TEK™ line,” said Jeremy Wagner - President/CEO at CE3S. “This partnership allows us to provide our customers with industry-leading ESD protection solutions that meet the highest standards of performance and reliability, ensuring their critical components remain safe at every stage of the process.”

Protektive Pak, a division of Desco Industries, specializes in static-safe handling and packaging products that meet the stringent requirements of the electronics industry. Their innovative solutions, including the ENDURA-TEK™ line, ensure reliable protection for sensitive components.
