FOR IMMEDIATE RELEASE

Count On Tools Introduces Custom MYDATA MIDAS Tool for N61381US Component Placement

GAINESVILLE, GA — March 2026 — Count On Tools, Inc. (COT), a leading provider of precision components and SMT spare parts, has developed a custom MYDATA MIDAS tool (part # 2026-5652) designed to support the placement of the N61381US component in accordance with customer drawing specifications.

The tool features a 0.125" outside diameter (OD) and 0.047" inside diameter (ID) with a 90° V-cut profile, designed to meet the customer's handling and placement requirements. It is pinned to D121 to maintain proper alignment and consistent positioning during pick-and-place operations.

The custom MIDAS tool was designed to improve stability and pickup accuracy when handling specialized or uniquely shaped components in automated SMT assembly. Its precision-machined geometry supports reliable vacuum performance, while the 90° V-cut helps seat and align the component during placement.

"With more than 35 years of experience designing and manufacturing custom pick-and-place tooling, our team works closely with customers to address specific placement challenges," said Curt Couch, Vice President, Count On Tools. "This project is a good example of how we can quickly develop a solution tailored to a particular component and machine platform."

Count On Tools designs and manufactures standard and custom nozzles, MIDAS tools, and component handling solutions for a wide range of SMT platforms, including MYDATA systems. The company supports applications ranging from micro-scale semiconductor devices to specialized connectors and other non-standard components used in electronics manufacturing.

For more information about custom MYDATA tooling solutions, email Count On Tools' sales team at sales@cotinc.com or visit www.cotinc.com.

###

About Count On Tools Inc.

Count On Tools Inc., a precision component manufacturer specializing in all aspects of the machining industry, has been setting new performance standards in the SMT pick-and-place nozzle market since 1991. As the ORIGINAL source for high-quality, low-cost vacuum placement nozzles and associated consumables, they have pioneered with world-class development and process engineers that combine to ensure that innovation and competitiveness is applied to all of its extensive product range. The company also stands behind its products 100% with a full warranty. Count On Tools' products are in use at many of the world's leading electronics manufacturing companies. Proven engineering expertise, coupled with the latest in design and manufacturing technology, has allowed the company to simplify the complexities of the industry and deliver a solution to its customers.

The company also maintains and supports a strong position in the hand tool industry, offering the highest quality hand tools in the world with PB Swiss Tools. These tools compliment any and all high-tech environments requiring optimum performance from both their equipment and technicians.
