FOR IMMEDIATE RELEASE

Count On Tools Focuses on Process Control with Pillarhouse Selective Solder Nozzles

GAINESVILLE, GA — April 2026 — Count On Tools, Inc. (COT), a leading provider of precision components and SMT spare parts, offers Pillarhouse selective solder nozzles, designed to support consistent solder flow and repeatable results across a range of assembly applications.

In selective soldering, nozzle performance has a direct impact on joint quality. Factors like flow control, fit, and durability all play a role in how well the process holds up over time. Count On Tools' Pillarhouse-compatible nozzles are built to deliver steady solder flow and clean joints, even on boards with tight spacing or more complex layouts.

These nozzles are manufactured to maintain consistency from run to run, helping reduce variation in the process and minimize rework. They are suited for production environments where stability and repeatability are critical.

“Selective soldering isn’t very forgiving when the nozzle isn’t right for the job,” said Curt Couch, Vice President of Count On Tools. “We spend a lot of time working through the details with customers—making sure the nozzle design matches the application so they can keep their process stable.”

In addition to standard options, Count On Tools offers custom nozzle designs with quick turnaround times and no design fees. This gives manufacturers flexibility when working with unique board designs or challenging components without slowing down production.

With more than 35 years in the industry, Count On Tools continues to supply both standard and custom nozzle solutions for SMT and selective soldering applications.

###

About Count On Tools Inc.

Count On Tools Inc., a precision component manufacturer specializing in all aspects of the machining industry, has been setting new performance standards in the SMT pick-and-place nozzle market since 1991. As the ORIGINAL source for high-quality, low-cost vacuum placement nozzles and associated consumables, they have pioneered with world-class development and process engineers that combine to ensure that innovation and competitiveness is applied to all of its extensive product range. The company also stands behind its products 100% with a full warranty. Count On Tools' products are in use at many of the world's leading electronics manufacturing companies. Proven engineering expertise, coupled with the latest in design and manufacturing technology, has allowed the company to simplify the complexities of the industry and deliver a solution to its customers.

The company also maintains and supports a strong position in the hand tool industry, offering the highest quality hand tools in the world with PB Swiss Tools. These tools compliment any and all high-tech environments requiring optimum performance from both their equipment and technicians.
