

CalcuQuote to Showcase Intelligent Sourcing and Quoting Solutions at 2026 APEX EXPO

Dallas US, February 2026 – CalcuQuote, a leading supply chain solutions provider for the electronics industry, will exhibit at the 2026 APEX EXPO, taking place March 17–19, 2026, at the Anaheim Convention Center in Anaheim, California. The company will be in Booth 3621, highlighting new capabilities in its supply chain and quoting platform that support day-to-day sourcing and purchasing decisions.

At APEX, CalcuQuote will highlight how intelligent automation is being integrated into its solutions to support everyday sourcing and procurement challenges. AI-powered capabilities help teams reduce costs, manage inventory and hard costs, speed delivery timelines, and prioritize preferred suppliers. By automating complex decision-making, users can focus more time on running their business while achieving more consistent, accurate outcomes for each assembly or order.

CalcuQuote is also expanding how data is used across the platform to improve visibility and decision-making. By centralizing information such as product change notifications, compliance data, environmental details, and approved alternates, users have timely access to the information they need to streamline workflows and respond quickly to supply chain changes.

New platform enhancements include an advanced labor module that allows manufacturers to continue using their existing labor models while connecting them to a

centralized materials and supply chain environment. This approach preserves the flexibility of complex labor routing while reducing manual data handling and providing a clearer view of quote accuracy and profitability.

In addition, CalcuQuote supports multi-year quoting, enabling teams to build quotes for current and future years. This functionality supports long-term contracts, helps maintain pricing stability, and gives both manufacturers and customers greater confidence in long-range planning.

The company will also preview expanded reporting and analytics capabilities. These improvements centralize data from hundreds of sources and provide faster, more flexible access to insights through self-service reporting tools designed to perform reliably with large data volumes and remain easy to use.

As part of Elisa Industriq's ecosystem of industrial innovators, CalcuQuote is also working closely with other Elisa Industriq businesses to deliver broader operational intelligence for electronics manufacturing.

Visitors to **Booth 3621** can see live demonstrations and speak directly with the CalcuQuote team about practical ways to improve quoting accuracy, sourcing decisions, and day-to-day supply chain operations.

About CalcuQuote

CalcuQuote provides software solutions that optimize supply chain operations across sourcing, purchasing, quoting, and supplier collaboration, serving as a strategic partner to EMS providers, OEMs, manufacturers, and component suppliers. The platform offers access to real-time supply data and seamless API integrations, ensuring end-to-end management that significantly improves the visibility and efficiency of supply chain processes. Founded in 2014, CalcuQuote now serves hundreds of companies worldwide and has established its platform as an indispensable system for the future of the electronics industry. CalcuQuote is an [Elisa Industriq company](#), a part of Elisa Corporation. For more information, visit www.calcuquote.com.

About Elisa Industriq:

Elisa Industriq creates software solutions for operational intelligence by multiplying industrial knowledge with AI innovation. Our businesses – camLine, sedApta, Elisa

Polystar, CalcuQuote, TenForce, and Gridle—serve over 2,000 clients internationally in the manufacturing, telecommunications, and energy sectors.

Elisa Industriq delivers business value for customers by reducing costs, improving quality, and generating growth. Our software solutions integrate with customers' existing systems to optimize their operations in areas including manufacturing execution, supply chain optimization, network analytics, and energy management.

Elisa Industriq is part of Elisa, a pioneer in telecommunications and digital services headquartered in Finland. Our shared mission is a sustainable future through digitalization. Elisa Industriq employs nearly 1,600 experts in Europe, Asia, and North America. elisaindustriq.com
