

CalcuQuote Announces Accelerate 2026 Conference, Inviting Electronics Industry Leaders to “Think Outside the BOM”

Dallas, March 24, 2026 -- CalcuQuote, a leading supply chain solutions provider for the electronics industry, announced that it will host Accelerate 2026, its annual user conference, from April 20–22, 2026, at Drury Plaza Hotel Dallas Richardson. The in-person event will bring together electronics manufacturing services (EMS) providers, OEMs, suppliers, and technology partners for two days of product deep dives, customer insights, and hands-on collaboration focused on maximizing the value of the CalcuQuote platform.

Built around the theme “Think Outside the BOM,” Accelerate 2026 will explore how manufacturers can go beyond traditional material costing to unlock broader supply chain intelligence. The event highlights how companies are leveraging the full CalcuQuote ecosystem—including integrated data, automation, and strategic partnerships—to improve quoting accuracy, reduce supply risk, and drive more informed purchasing decisions.

Accelerate is designed specifically for organizations actively using—or considering—CalcuQuote to improve quoting, sourcing, and supply chain workflows. Attendees will include executives and decision-makers responsible for operational performance and ROI, power users seeking advanced workflows and integrations, system administrators managing CalcuQuote deployments, and newer users looking to deepen their understanding of the platform.

“Accelerate is about helping our customers get the most out of their investment in CalcuQuote. The sessions focus on real product usage, measurable ROI, and direct conversations with the experts who build and support the platform. It’s an opportunity for our customers and partners to share ideas, learn from each other, and discover new ways to strengthen their supply chain strategies.” said Kaitlyn Tredaway, the COO at CalcuQuote.

The conference will feature product and architecture deep dives, customer success stories, interactive discussions, and open Q&A sessions with CalcuQuote subject matter experts (SME). Dedicated SME tables will allow attendees to explore topics such as reporting, MSA, compliance, labor modeling, and automation in smaller, hands-on discussions.

Accelerate will also highlight the broader CalcuQuote ecosystem and its role in supporting smarter decision-making across the electronics supply chain. Integrated solutions and partners include Beeproduced, Accuris, Banyan.eco, and Cetec ERP, along with key distribution and supplier partners.

The event begins on April 20 with an informal evening networking reception, followed by two days of programming focused on product innovation, advanced use cases, and peer collaboration. Approximately 100 attendees are expected this year.

CalcuQuote's platform helps electronics manufacturers transform RFQs into structured project data, generate accurate quotes faster, and gain real-time visibility into component availability, lifecycle status, compliance requirements, and supply chain risks. By combining automation, data intelligence, and integrated workflows, the company enables organizations to quote faster, purchase smarter, and compete more effectively in a rapidly changing electronics market.

Registration for Accelerate 2026 is now open. For more information or to reserve a ticket, visit: <https://www.elisaindustriq.com/resources/events/calcuquote-accelerate-2026-electronics-supply-chain-conference>.

About CalcuQuote

CalcuQuote delivers supply chain software built for electronics manufacturing. The platform provides operational intelligence for EMS providers, OEMs, and suppliers across sourcing, purchasing, and quoting in a single, connected system. With real-time supply data and seamless system integrations, CalcuQuote increases visibility, speed, and control across the entire supply chain. Founded in 2014, CalcuQuote serves hundreds of companies worldwide and is recognized as a trusted system for forward-thinking electronics manufacturers. CalcuQuote is a business unit of Elisa Industriq. www.elisaindustriq.com/calcuquote

About Elisa Industriq

Elisa Industriq creates software solutions for operational intelligence by multiplying industrial knowledge with AI innovation. Our businesses – camLine, sedApta, Polystar, CalcuQuote,

TenForce, and Gridle – serve over 2,500 clients internationally in the manufacturing, telecommunications, and energy sectors.

Elisa Industriq delivers business value for customers by reducing costs, improving quality, and generating growth. Our software solutions integrate with customers' existing systems to optimize their operations in areas including manufacturing execution, supply chain optimization, network analytics, and energy management.

Elisa Industriq is part of Elisa, a pioneer in telecommunications and digital services headquartered in Finland. Our shared mission is a sustainable future through digitalization. Elisa Industriq employs over 1,500 experts in Europe, Asia, and North America. [elisaindustriq.com](https://www.elisaindustriq.com)
