Jack Doetzer, MBA, Appointed as President of Circuit Technology Inc., Continuing Family Legacy

HOLLY SPRINGS, NC — April 2025 — Circuit Technology Inc. (CTI), a leading provider of equipment for the assembly, repair, and cleaning of printed circuit boards, proudly announces that Jack Doetzer, MBA, has been appointed as President, succeeding his father, Bob Doetzer, in leading the company into its next chapter of growth.

Founded in 1994 by Bob Doetzer, Circuit Technology Inc. has continually evolved by evaluating and offering the best PCB assembly equipment and training for its customers. CTI specializes in providing high-value solutions for circuit board assembly, repair, and cleaning, ensuring its clients receive the most effective and innovative technology available.

Jack Doetzer brings extensive experience in sales, business development, and strategic management, making him well-equipped to uphold the company's legacy while driving future advancements. His professional background includes leadership roles at Altus Group, South-Tek Systems, and Nordson Polymer Processing Systems, where he honed his expertise in customer relations, market expansion, and business strategy.

Jack holds a Master of Business Administration (MBA) from East Carolina University, where he also earned a Bachelor of Science in Applied Economics. His educational and professional experience positions him uniquely to lead Circuit Technology Inc. in maintaining its reputation for quality PCB assembly equipment and training, while exploring new opportunities for growth.

“I am honored to step into this role and continue the legacy my father built,” said Jack Doetzer. “Circuit Technology Inc. has always been providing top-tier solutions to our customers for more than 30 years, and I look forward to leading the company into its next phase of success.”

Under Jack's leadership, Circuit Technology Inc. will continue to focus on delivering high-quality circuit board assembly, repair, and training while expanding its capabilities to meet the current needs of the electronics manufacturing industry.
