

## **Conesus LLC Achieves RMI Compliance**

*Terrell, Texas, USA* -- Conesus, a sophisticated recycler of complex industrial metals residues and wastes, has successfully completed the rigorous assessment process and is now certified as compliant with the Responsible Minerals Initiative (RMI) standards.

The Responsible Minerals Initiative (RMI) is a leading global program that provides companies with tools and resources to make informed decisions about responsible

sourcing of minerals in their supply chains. Focused primarily on tin, tantalum, tungsten, and gold (3TG), the RMI supports companies in addressing risks related to conflict,

human rights abuses, and environmental impacts.

In making the announcement, Steve Butler, Commercial Director of Conesus, said, "This achievement reflects our ongoing commitment to ethical and sustainable business practices. RMI compliance reinforces the trust our customers place in us and underscores our dedication to

responsible sourcing throughout our supply chain."

Conesus LLC operates a pyrometallurgical recycling facility dedicated to the recovery of tin, lead, and precious metals from wastes containing primarily Tin, Lead, and Antimony.
