DISTRON Showcases Full-Service Electronics Manufacturing Capabilities at Design-2-Part Show

North Attleboro, MA — September 2025 — DISTRON CORPORATION, a leading U.S.-based electronics contract manufacturer, is pleased to announce plans to exhibit at the Design-2-Part Trade Show in Marlborough, MA. Attendees are invited to visit Booth #218 on October 15–16 to learn how DISTRON helps OEMs accelerate time-to-market with high-quality, flexible manufacturing solutions.

With over 50 years of experience, DISTRON has built a reputation for quality, responsiveness, and customer-centric service. The family-owned company supports customers from NPI through full-scale production with surface mount assembly, box build, functional testing, inspection, warehousing, and end-customer fulfillment.

“Our mission is to be a true partner to OEMs, giving them the flexibility and confidence to scale their production without compromising quality,” said Robert H. Donovan, CEO of DISTRON. “Whether customers need a quick-turn prototype or a fully integrated system build, we have the equipment, processes, and expertise to deliver.”

DISTRON's Marlborough facility is equipped with state-of-the-art Mycronic SMT systems designed for fast changeovers and high-mix, low-volume production. The company's operators and inspectors are trained and certified to IPC-A-610 and J-STD-001 standards, and DISTRON holds ISO 9001:2015 and ISO 13485 certifications, underscoring its commitment to quality.

Beyond electronics assembly, DISTRON has a strong focus on sustainability, partnering with clean tech innovators to create solutions that reduce energy consumption and adhering to RoHS directives across its processes.

DISTRON invites engineers, supply chain professionals, and OEM decision-makers to stop by Booth #218 to discuss their upcoming projects and discover how DISTRON can help bring their designs to life.
