Kurtz Ersä and Connect Tech Empower Engineers with Advanced Selective Soldering Training

Plymouth, WI — October 2025 — Kurtz Ersä Inc., a leading supplier of electronics production equipment, and Connect Tech, a hardware design and manufacturing company specializing in rugged, small form factor solutions, recently partnered to host an Advanced Selective Soldering Training Course from September 23–24 at Connect Tech’s facility in Ontario, Canada.

The two-day program drew participants from across the United States and Canada for an immersive learning experience. The sessions were led by Joe Clure, Head of Application/Demo Center at Kurtz Ersä, Inc., and covered advanced process control, optimization, and troubleshooting techniques for Ersä’s selective soldering systems.

The training combined classroom instruction with hands-on machine operation, giving attendees the opportunity to apply best practices in real-time production scenarios.

Participants gained valuable insights into achieving consistent soldering quality, reducing cycle times, and maintaining system reliability.

“These courses continue to build process knowledge and help our customers optimize their operations,” said Albrecht Beck, President of Kurtz Ersä, Inc. “Our goal is to ensure every user gets the most out of their equipment while advancing their overall manufacturing capability.”

Connect Tech’s engineering-driven culture and focus on high-reliability designs align closely with Kurtz Ersä’s mission to deliver technology solutions that help manufacturers meet modern production challenges.

Together, Kurtz Ersä and Connect Tech are helping engineers and technicians across North America elevate their technical skills and drive continuous improvement in selective soldering processes.
