

Press release

Kurtz Ersä and Comtree Bring Precision Rework and Soldering Solutions to EPTECH Edmonton

Plymouth, WI — October 2025 — Kurtz Ersä Inc., a leading supplier of electronics production equipment, in collaboration with its long-time Canadian representative Comtree Inc., is headed to EPTECH Edmonton on October 30, 2025, at the Fantasyland Hotel to connect with electronics professionals and highlight the latest advances in rework, soldering, and energy-efficient production technology.

Front and center will be Ersä's HR 600 XL rework system, designed to take on the toughest rework challenges in modern assembly. Whether it's large-format BGAs, dense QFNs, or mixed-technology boards, the HR 600 XL combines intelligent process control, vision-guided alignment, and automated thermal profiling to deliver consistent, repeatable results. Its large working area and precise heat management make it a go-to system for aerospace, defense, and high-reliability electronics manufacturers facing increasingly complex repair demands.

Visitors can also learn more about Ersä's HOTFLOW reflow ovens, recognized worldwide for their balance of thermal performance and sustainability. The HOTFLOW series is engineered to reduce energy and nitrogen consumption while maintaining tight process control—an advantage for manufacturers focused on improving both throughput and environmental performance.

The Comtree team will be available throughout the event to discuss practical approaches to improving rework precision, streamlining soldering operations, and lowering operating costs. Attendees are encouraged to stop by and exchange insights with the team.

Comtree, Inc. is Kurtz Ersä's local representative. For more information about Comtree, e-mail Ernesto Provenzano at ernesto@comtreeinc.com, Graham Gibson P.Eng. at graham@comtreeinc.com, or call 905 673-7777.
