Kurtz ErsA Powers High-Performance, Low-Energy Manufacturing at SMTA Utah Expo & Tech Forum

Plymouth, WI — October 2025 — Kurtz ErsA Inc., a leading supplier of electronics production equipment, will exhibit at the SMTA Utah Expo & Tech Forum on Tuesday, November 4, 2025 at the Salt Lake City Marriott University Park.

During the event, ErsA will discuss a lineup of equipment built to improve process control, consistency, and yield in high-reliability electronics manufacturing. The company's exhibit will feature several of its latest systems designed to handle today's complex assemblies while reducing operating costs and environmental impact.

Featured equipment includes:

- **HOTFLOW THREE Reflow Oven** – Equipped with ErsA's SCPU® (Smart Convection Power Unit), this system delivers precise thermal control with lower nitrogen consumption. Its advanced thermal management and Industry connectivity make it a standout for both performance and efficiency.
- **VERSAFLOW ONE and VERSAFLOW 4/55 Selective Soldering Systems** – Built for flexibility and throughput, these platforms offer single-pot and dual-pot VERSAFLEX configurations, a modular design, and CAD Assistant 4 for fast setup and optimized process control. Both systems are fully compatible with connected-factory standards.
- **HR 600P Rework System** – Designed for challenging SMT components such as BGAs, QFNs, and fine-pitch connectors, the HR 600P provides precise heat management and repeatable rework results on densely populated boards.
- **i-CON TRACE Soldering Station** – ErsA's first fully networked soldering station offers complete traceability and IoT integration, giving manufacturers detailed insight into every step of the hand-soldering process.

Visitors to the ErsA booth will have the opportunity to meet with technical experts and discuss how these systems can enhance soldering precision, improve reliability, and reduce production costs across a range of applications.
