### Kurtz ErsA Takes Soldering and Reflow Solutions on the Road to Three SMTA Expos in May

Plymouth, WI — April 2026 — Kurtz ErsA Inc., a leading supplier of electronics production equipment, will exhibit at three upcoming SMTA regional expos in May, connecting with electronics manufacturers across the Midwest and Mexico.

Kurtz ErsA will participate in the following events:

- **SMTA Wisconsin Expo & Tech Forum**  
Tuesday, May 5, 2026  
Crowne Plaza Milwaukee Airport – Milwaukee, Wisconsin
- **SMTA Upper Midwest Expo & Tech Forum**  
Tuesday, May 12, 2026  
DoubleTree Minneapolis – Park Place – Minneapolis, Minnesota
- **SMTA Ciudad Juárez Expo & Tech Forum**  
Thursday, May 21, 2026  
Injectronics Convention Center – Ciudad Juárez, Chihuahua, Mexico

At each stop, Kurtz ErsA will be showing a mix of newer platforms and proven systems across reflow, selective soldering, rework, and hand soldering.

That includes the HOTFLOW THREE reflow oven, designed to keep thermal profiles consistent while cutting down on nitrogen use, along with the VERSAFLOW selective soldering lineup. Systems like the VERSAFLOW FIVE are built to handle more throughput without adding complexity, while smaller configurations like the VERSAFLOW 4 CORE Edition focus on core functionality in a tighter footprint.

On the soldering side, the POWERFLOW platforms offer a straightforward approach to selective soldering, whether the need is flexibility or a simpler setup that just works. For rework, the HR 600 XL continues to be a go-to for larger components and dense assemblies.

Kurtz ErsA will also be highlighting the i-CON TRACE soldering station, which brings traceability into hand soldering with built-in connectivity and data tracking.

## Press release

---

Rather than focusing on one type of production, the lineup is meant to cover a range of real-world scenarios—high-mix, higher volume, or somewhere in between—where consistency and control matter.

Anyone attending the shows is encouraged to stop by and talk through current projects or challenges on the line.
