**FOR IMMEDIATE RELEASE**

## FlashPCB Welcomes Adam Broeckert, EIT as Manufacturing Engineer

**PHILADELPHIA, PA — April 2026 —** FlashPCB, a leading provider of quick-turn PCB assembly, is pleased to announce the addition of Adam Broeckert, EIT, as Manufacturing Engineer.

In this role, Broeckert will support FlashPCB's production operations, working closely with engineering and manufacturing teams to optimize processes, improve efficiency, and ensure high-quality output for customers requiring fast, reliable PCB assembly. He will play a key role in supporting design for manufacturability (DFM), troubleshooting production challenges, and helping scale operations as demand continues to grow.

Broeckert brings a strong background in systems and vehicle engineering from his previous role at Booz Allen Hamilton, where he supported the United States Postal Service's Next Generation Delivery Vehicle (NGDV) program. His experience includes coordinating and executing test programs, contributing to engineering design solutions, and working directly with manufacturing teams to evaluate progress and performance.

He holds a Bachelor of Science in Mechanical Engineering from The University of Alabama, where he graduated summa cum laude, and is certified as an Engineer in Training (EIT).

FlashPCB specializes in quick-turn PCB assembly, offering a streamlined process that includes automated design rule checks, rapid bill of materials generation, and fast quoting to help customers move from design to production with speed and confidence.

"Adam brings a strong mix of engineering fundamentals and real-world program experience," said Thomas Castner, CEO, FlashPCB. "His ability to work across design, testing, and manufacturing will be a valuable asset as we continue to grow and support our customers' timelines."

Based in Philadelphia, FlashPCB supports a wide range of industries with fast, dependable PCB assembly solutions designed to meet tight deadlines without compromising quality.
