## Fuji America Corporation Brings Smarter, More Flexible Pick-and-Place Platforms to SMTA International 2025

**Vernon Hills, IL – October 2025** – Fuji America Corporation will exhibit at SMTA International 2025, taking place October 21–23, 2025 at the Donald E. Stephens Convention Center in Rosemont, Illinois. Visitors can find Fuji America in Booth #2829, where the company will feature its latest pick-and-place innovations—the NXTR S and AIMEXR—designed to bring greater precision, scalability, and adaptability to surface mount production.

The **NXTR S** is the next evolution of Fuji’s modular pick-and-place systems, built around the concept of a fully autonomous production line. Each module can operate independently, allowing lines to expand or reconfigure as production needs change. The NXTR S integrates material verification, smart component supply management, and real-time predictive maintenance, minimizing operator intervention and ensuring consistent quality. Its modular architecture allows manufacturers to adapt to evolving production requirements without disrupting throughput.

The **AIMEXR** is designed for manufacturers who need flexibility without compromise. Supporting a wide component range—from ultra-small chips to larger, odd-form parts—the AIMEXR adapts easily to high-mix production environments. Its advanced placement heads, automatic feeder exchange, and rapid changeover functions help maximize uptime and maintain throughput even as production requirements shift. Operators can use Fuji's NEXIM software for centralized control of production data and process traceability.

At SMTA International, Fuji America will demonstrate how these systems simplify complex assembly processes, reduce setup time, and maintain stable throughput even under demanding production conditions. Both platforms reflect Fuji's ongoing focus on developing practical, high-performance equipment that meets the real challenges of modern electronics manufacturing.

Join Fuji America at **Booth #2829** to discover how our advanced SMT solutions can drive smarter, faster, and more adaptable production.

#### **About Fuji America Corporation**

Fuji America is a recognized leader in SMT pick-and-place solutions and smart factory automation. We are committed to driving the future of modern manufacturing through high-speed, high-precision placement machines, advanced screen printers, and intelligent software. With decades of innovation in vision processing and part recognition, Fuji's robotic electronic component mounters continue to set industry standards for quality, performance, and reliability.
