Green Circuits Joins Edge Autonomy Partner Day for Inside Look at Next-Generation Uncrewed Systems

SAN JOSE, CA — December 2025 — Green Circuits, a full-service Electronics Manufacturing Services (EMS) partner to leading OEMs, recently attended the Edge Autonomy Partner Day held in San Luis Obispo, California. The event brought together key suppliers for an inside look at Edge Autonomy's operations, technology roadmap, and future partnership opportunities.

As an invited supplier, Green Circuits had the opportunity to tour Edge Autonomy's state-of-the-art facility and gain deeper insight into the company's production capabilities. The visit included an overview of Edge Autonomy's highly engineered uncrewed systems, which support a range of military, civil, and academic missions. Their product portfolio includes Group 2 and Group 3 tactical unmanned aircraft systems, ISR payloads, fuel-injected engines, catapults, ground control systems, and resilient solid oxide fuel-cell solutions.

During the visit, attendees also traveled to a local flight field where they witnessed a live demonstration of one of Edge Autonomy's unmanned aircraft in operation—highlighting the performance and precision of its multi-mission platform.

For Green Circuits, the event offered meaningful insight into how its manufacturing capabilities continue to support Edge Autonomy's complex system requirements. Conversations throughout the day focused on strengthening the supplier partnership, aligning on future needs, and identifying opportunities to expand Green Circuits' support for mission-critical programs.

Green Circuits attendees included Adam Szychowski, John De La Cruz, and Tuan Tran.
