FOR IMMEDIATE RELEASE

Horizon Sales Brings Test, Clean, and Automation Tech to the Forefront at APEX 2026

BRIGHTON, MI — February 2026 — Horizon Sales, a leading manufacturer’s representative and distributor to the electronics industry, will exhibit at the 2026 APEX EXPO, taking place March 17-19, 2026, in Anaheim, California, where the company will showcase testing, cleaning, and automation technologies in Booth 3720. The exhibit will highlight solutions designed to help electronics manufacturers improve process control, reliability, and day-to-day production efficiency.

The Horizon Sales team will be onsite throughout the event, representing its full portfolio of manufacturers and demonstrating equipment used to evaluate contamination, moisture-related risks, and assembly robustness across electronics manufacturing environments.

Featured in the booth will be several solutions from **Gen3 Systems**, including:

- **AutoSIR2+™** – A surface insulation resistance testing system used to evaluate material and process reliability
- **AutoCHT™** – An automated condensation and humidity testing system for identifying moisture-related failure risks
- **Contaminometer™ (CM+ Series)** – An ionic contamination tester used for process control and quality verification
- **Gensonic™ Stencil Cleaner** – A compact ultrasonic stencil cleaning system designed for fast, effective cleaning
- **HATS²™ System** – A reliability evaluation tool for analyzing via structures and assembly robustness

Also on display will be the **Quasi Model C2 Autonomous Mobile Cart**, a self-driving material transport solution built to improve internal logistics and support flexible manufacturing environments.

“We’re bringing in tools that answer the questions manufacturers deal with every day—

cleanliness, reliability, and how to improve materials movement and efficiency on the factory floor,” said Josh Casper, President of Horizon Sales. “If someone has a challenge, there’s probably something in our booth that helps address it.”

The APEX EXPO is the largest electronics manufacturing event in North America, bringing together OEMs, EMS providers, suppliers, and industry experts for technical education, standards development, and hands-on technology demonstrations.
