FOR IMMEDIATE RELEASE

Horizon Sales Adds LPKF Laser and Electronics to Its Lineup, Bringing Precision Laser Technology to Midwest Manufacturers

BRIGHTON, MI — April 2026 — Horizon Sales, a leading manufacturers' representative and distributor to the electronics industry, is pleased to announce a new partnership with LPKF Laser and Electronics, a global leader in precision laser technology. Through this partnership, Horizon will represent LPKF's **laser depaneling systems** and **laser stencil cutting solutions**, expanding its portfolio of high-precision equipment for electronics manufacturing.

For more than 30 years, Horizon Sales has partnered with manufacturers to solve production challenges, streamline processes, and integrate advanced technologies. By adding LPKF's laser depaneling and stencil systems, Horizon continues to provide Midwest manufacturers with solutions that enhance precision, improve yield, and support efficient production from prototyping through full-scale manufacturing.

Precision Laser Solutions for Electronics Manufacturing

Laser Depaneling Systems

- High-precision PCB depaneling with no mechanical stress
- Material Processing flexibility
- Clean edge quality ideal for sensitive components and advanced assemblies
- Flexible processing for complex board geometries

Laser Stencil Systems

- High-accuracy laser cutting for SMT stencils
- Consistent aperture quality for improved paste release and print performance
- Fast turnaround for prototyping and production stencil needs

“LPKF is a recognized leader in laser processing technology, and we’re excited to bring their depaneling and stencil solutions to our customers,” said Josh Casper, President of Horizon Sales. “These systems allow manufacturers to increase precision, reduce defects, and improve overall process control in critical areas of electronics assembly.”

With LPKF’s laser depaneling and stencil technologies now part of its offering, Horizon Sales continues its mission of connecting manufacturers with solutions that drive efficiency, reliability, and innovation—making complex processes simpler and more effective.
