**FOR IMMEDIATE RELEASE**

## **Horizon Sales Earns #1 Sayaka PCB Router Sales Award for 2025**

**BRIGHTON, MI — April 2026** — Horizon Sales, a leading manufacturer’s representative and distributor to the electronics industry, has been recognized by Seika Machinery, Inc. with the #1 Sayaka PCB Router Sales Award for 2025, acknowledging the company’s strong performance and customer support in delivering Sayaka depanelization solutions across its territory.

The award reflects Horizon Sales’ success in helping electronics manufacturers implement Sayaka PCB routing systems, including the SAM-CT23Q and SAM-CT35Q table-top models. These systems are widely used for stress-free depanelization of densely populated PCBs, offering clean, precise cutting while minimizing the risk of damage to sensitive components.

Sayaka routers are designed with a fixture-based dust vacuum system to maintain a clean working environment, along with manual router bit depth adjustment to extend tool life. High spindle speeds up to 60,000 rpm and repeatability of  $\pm 0.02$  mm support consistent, accurate results, while user-friendly operation and low maintenance requirements make them a practical fit for a range of production environments.

“We’re honored to receive Seika Machinery’s #1 Sayaka PCB Router Sales Award for 2025,” said Josh Casper, President of Horizon Sales. “Our team is committed to helping electronics manufacturers achieve precise, efficient, and stress-free depanelization with Sayaka routers. This recognition reflects not just strong sales, but our dedication to supporting customers with solutions that protect sensitive components, improve throughput, and simplify their production processes.”

Horizon Sales works closely with manufacturers to improve throughput, reduce handling stress, and maintain quality throughout the PCB separation process.
