FOR IMMEDIATE RELEASE

Horizon Sales Adds High-Speed PCB Testing with Takaya Flying Probe Systems

BRIGHTON, MI — April 2026 — Horizon Sales, a leading manufacturers' representative and distributor to the electronics industry, is proud to announce that it is now representing Takaya Flying Probe Test Systems, a global leader in high-speed, fixtureless circuit board testing. This addition gives Midwest electronics manufacturers access to advanced test solutions trusted by the world's leading EMS providers across medical, military, aerospace, and industrial sectors.

Since 1984, Takaya has been pioneering flying probe technology, combining decades of expertise in probe actuation, precision positioning, and advanced measurement. Their systems provide exceptional test coverage, integrated optical testing, and diagnostic tools that streamline setup, accelerate troubleshooting, and maximize confidence in results.

Precision Testing Meets Efficiency

Designed for today's fast-paced electronics production, Takaya Flying Probe systems combine accuracy and efficiency to keep manufacturing moving.

- **Ultra-high-speed, fixtureless testing** – Test complex PCBs quickly without expensive fixtures
- **Intuitive setup and programming** – Teach-In method or CAD-based programming compatible with over 40 CAD systems
- **Advanced diagnostics** – Automated reference value determination, fault analysis, and program optimization

“Takaya Flying Probe systems set the standard for reliability and speed in high-mix PCB testing,” said Josh Casper, President of Horizon Sales. “By adding this technology to our lineup, we can help our customers reduce costs, improve yield, and confidently scale their production”

Horizon Sales continues to deliver more than distribution—it provides manufacturers with hands-on support, expert consultation, and practical solutions to optimize every step of electronics assembly and testing.
