Intersurface Dynamics Signs Exclusive Representative Agreement with Eumetrys in France

BETHEL, CT., November 24, 2025 — Intersurface Dynamics, a subsidiary of Amtech Systems, Inc. and a manufacturer of application-specific chemicals used in the production of semiconductor devices and substrates announces today that it has entered into a representative's agreement with Eumetrys, appointing them as the exclusive sales representatives in France covering its entire product range including coolants, detergents and suspension vehicles.

“We are excited to partner with Eumetrys, whose expertise and network in the semiconductor industry in France aligns perfectly with our strategic growth objectives in Europe,” said Yann Visintainer, Director of Business Development for Europe.

“Through this agreement, we bring deep process chemistry

expertise to support strategic accounts in critical markets.”

EUMETRYS brings 20 years of experience in expert refurbishment, upgrades, and repair of semiconductor capital assets and has established themselves as a trusted representative for top-tier brands. The partnership is expected to deliver increased visibility, improved customer engagement, and sustainable growth for both organizations.

“Eumetrys is honored to represent Intersurface Dynamics in France,” said Samy Venin, Director of Sales for Eumetrys. “Our partnership with Intersurface Dynamics gives our customer base access to advanced process chemistry capabilities improving yield, optimizing costs, and delivering exceptional expert support.”

The representative’s agreement took effect on November 7, with initial activities focusing on customer outreach, new product launch support, training, and spare parts management.

About Intersurface Dynamics Inc.

Intersurface Dynamics, a member of the Amtech Group, has manufactured application-specific chemicals used to achieve specific surface morphologies on a variety of materials since 1985. Our customers include some of the world's largest manufacturers of semiconductor devices, silicon wafers, precision optics, ophthalmic lens, ceramics, advanced displays and flat glass. These manufacturers rely on our proven products and expertise to optimize critical high-volume manufacturing. Learn more at www.isurface.com.
