ITW EAE Extends Agreement with IPP to Represent Electrovert Products

Lakeville, Minnesota, February 2, 2026 - ITW EAE is pleased to announce an extension of its partnership with IPP, expanding their role to include representation and distribute Electrovert soldering and cleaning equipment. This enhancement builds upon IPP's existing representation of ITW EAE's Vitronics Soltec soldering equipment, further strengthening the collaboration between the two companies. IPP has been a long-standing and trusted partner since 2009, marking more than 15 years of successful cooperation.

"We are delighted to extend our cooperation with IPP for the UK & Ireland market by appointing them as our official dealer for the Electrovert wave and cleaning range of equipment," said Frank van Erp, EMEA Sales Director for ITW EAE. "Over the years, IPP has consistently demonstrated values that align closely with our own – a strong technical sales mindset, high ethical standards, transparency, and a proactive approach to problem – solving. We are confident that our existing customers will continue to receive exceptional support as we build on our successful partnership."

"Having worked with Vitronics Soltec part of ITW EAE, for over 20 years, and being involved in many solder wave projects, IPP are delighted to add the Electrovert wave and cleaning equipment to the IPP portfolio," said Jack Daly, managing director for IPP. "The Electrovert range adds more quality solutions for our customer, while enjoying the same level of support and customer service that they have come to expect from IPP, as the leading distributor of Electronics Manufacturing equipment in the UK and Irish markets."

IPP has been a trusted provider of products and services to the electronics industry for over 40 years. Serving many of the leading global electronics manufacturers across the UK and Ireland, IPP attributes its sustained growth to strong relationships with both clients and suppliers. With extensive experience in the volume electronics manufacturing environment, the IPP team offers deep technical knowledge and highly responsive engineering support, making equipment sales and service a natural fit for the organization.
