Inovaxe to Demonstrate Smarter Line-Side Material Control at SMTA Querétaro

Boca Raton, FL — June 2026 — Inovaxe, a world leader and provider of innovative material handling and storage systems, will exhibit at the SMTA Querétaro Expo & Tech Forum, taking place Thursday, July 16, 2026 in Querétaro, Mexico. Attendees are invited to visit Booth #51 to meet with Daniel Enriquez and see how Inovaxe is helping manufacturers improve material control and line efficiency.

At the event, Inovaxe will feature its SR200-7 mobile Smart Rack, LS350 Line Side Smart Rack, and the InoBright Smart Storage Management System, with live demonstrations focused on real production scenarios.

The SR200-7 Smart Rack is designed to strike a balance between storage density and mobility, allowing manufacturers to manage mixed reel sizes within a single, organized system. Using LED-guided pick and return, the rack helps operators quickly locate materials while maintaining full visibility of each UID as it transfers between locations. This approach supports Inovaxe’s “single-package, single-location, and dynamic allocation” philosophy, helping eliminate misplaced inventory and improve traceability across operations.

Also on display, the LS350 Line Side Smart Rack provides immediate access to up to 192 seven-inch reels directly at the SMT line. Designed to support just-in-time replenishment, the LS350 reduces operator travel and keeps critical components within reach. Its compact footprint makes it well-suited for high-mix environments where quick changeovers and continuous production flow are essential.

Inovaxe will also showcase its InoBright Smart Storage Management System, which converts traditional OEM pick-and-place feeder carts into intelligent, connected storage assets. By adding real-time visibility and traceability to feeder management, InoBright helps eliminate common setup errors and speeds up feeder changeovers, reducing downtime and improving overall line efficiency.

“Inovaxe solutions are built around how production actually works,” said Daniel Enriquez, Regional Sales Manager at Inovaxe. “At SMTA Querétaro, we’re looking forward to showing how better material control at the line level can make a measurable difference in throughput, accuracy, and operator efficiency.”

Visitors to Booth #51 are encouraged to stop by for a live demonstration and discuss how Inovaxe solutions can be applied to their specific production challenges.

About Inovaxe Corp.

Inovaxe Corporation is focused on delivering innovative ultra-lean SMART production and inventory management solutions to the electronics industry. The Company’s product offering includes mobile InoAuto Smart carts (IA series), Smart racks (SR series), Line Side racks (LS Series) and Smart stationary racks (SREX series) to store SMT reels, tubes, trays, cut tape and loose parts. We provide a Smart MSD cabinet (IMSD) for moisture sensitive device storage and a Smart stencil rack storage solution (SRS series). We offer a material planning/kitting management tool with our InoAuto inventory management software for storing, locating and picking components.
