**IPC/APEX Booth #2638 – Halls C & D**

### **INSPECTIS® Launches New Ring Light, Will Debut at APEX**

*Kista, Sweden* - INSPECTIS AB announces the launch of a new Ring Light, HD-124-WUV, a Dual White & UV Ring Light with integral Dimmer and Segment Control. Developed for use with INSPECTIS' digital microscopes, the new Ring Light will debut at IPC/APEX in Anaheim, California, March 14 - 19, 2026, in booth# 2638 (Microscope World) at the Anaheim Convention Center.

In making the announcement, Johan Stormlund, Marketing and Sales Manager, Industrial Applications, said, "Our new HD-124-WUV is an industrial grade ring light containing 32 white, and 8 high power UV LEDs arranged along two rings." This feature-packed unit is designed for applications where sequential or independent white and UV illumination is needed. It offers homogenous, high-intensity light output and features an integrated On/Off switch with electronic dimmer. It also features dedicated switches for UV and segment control." For optimal cable management, the ring light is powered directly via the Inspectis digital microscope. An optional Polarizer/Analyzer filter kit is available for use with the ring light; also, a detachable diffuser is included in the ring light.

#### **About Inspectis AB**

INSPECTIS AB designs and produces digital optical microscopes, including world-leading 4K resolution devices. INSPECTIS offers plug and play, reliable and cost-effective digital camera microscopes designed for demanding non-contact optical inspection and assembly. INSPECTIS microscopes are distributed by Microscope World, a distributor of a broad range of microscope, digital imaging, and

inspection systems based in Carlsbad, California. For more information, visit
