KIC to Exhibit Advanced Thermal Process Control Solutions at SMTA Monterrey Expo

San Diego — April 2026 — KIC, a global leader in thermal process control solutions for electronics manufacturing, will exhibit at the SMTA Monterrey Expo & Tech Forum on April 23, 2026 in Monterrey, Mexico, at Booth 42.

As Mexico continues to experience rapid growth as a global electronics manufacturing hub, the need for efficient, high-reliability process control has never been greater. KIC will showcase its latest solutions designed to help manufacturers achieve faster NPI, higher throughput, and improved product quality.

At the event, KIC will highlight its Thermal Analysis System (TAS), a platform that simplifies thermal profiling and delivers real-time process optimization. TAS reduces setup complexity while providing actionable insights that improve traceability and ensure consistent production performance.

A key feature of TAS is KIC's award-winning Common Recipe Finder, which identifies a single optimized oven recipe across multiple assemblies. This capability reduces the need for repeated profiling, shortens changeover time, and maximizes oven utilization—enabling manufacturers to increase productivity while maintaining process stability.

KIC will also feature its innovative HeatMap™ technology, which transforms standard profilers into continuous, real-time oven monitoring systems. By providing instant visibility into thermal performance and identifying process drift early, HeatMap enables proactive control, reducing defects, minimizing rework, and ensuring consistent quality.

KIC invites attendees to visit Booth 42 to connect with its thermal experts and discover how to enhance process visibility, control, and efficiency.
