FOR IMMEDIATE RELEASE

KIC to Exhibit at SMTA Querétaro Expo & Tech Forum 2026

San Diego, CA — June 2026 — KIC will exhibit at the SMTA Querétaro Expo & Tech Forum in Querétaro, Mexico on Thursday, July 16, 2026. Visitors to Booth 96 can meet with KIC Service Engineer Miguel Flores to discuss the latest advancements in thermal process optimization, automation, and traceability for electronics manufacturing.

As product complexity and quality requirements continue to increase, manufacturers need greater visibility into their thermal processes. KIC's Heat to Data™ ecosystem helps transform thermal process measurements into actionable manufacturing intelligence through automated profiling, machine performance monitoring, continuous process verification, and advanced analytics.

Attendees will learn how KIC solutions help manufacturers:

- Accelerate new product introductions and recipe optimization
- Improve process consistency with automated profiling and real-time verification
- Monitor reflow and wave solder equipment performance
- Strengthen traceability and data-driven decision-making
- Reduce scrap, rework, and process variability

“We look forward to meeting with manufacturers in Querétaro and discussing practical ways to improve thermal process control, efficiency, and product quality,” said Flores.

Visit KIC at Booth 96 during the SMTA Querétaro Expo & Tech Forum to learn how to turn Heat to Data™.

About KIC

KIC is the market leader in thermal process traceability, optimization, and control solutions for electronics manufacturing, helping manufacturers improve quality, reduce costs, and increase process visibility through data-driven thermal management.
