KYZEN's ANALYST² Recognized as Industry-Leading Process Control Solution at 2025 Global Technology Awards

NASHVILLE — November 2025 — KYZEN, the global leader in innovative environmentally responsible cleaning chemistries, is proud to announce that its ANALYST² Advanced Process Control System has received a 2025 Global Technology Award in the Best Product – North America category. The award was presented at productronica in Munich on Tuesday, November 18, 2025.

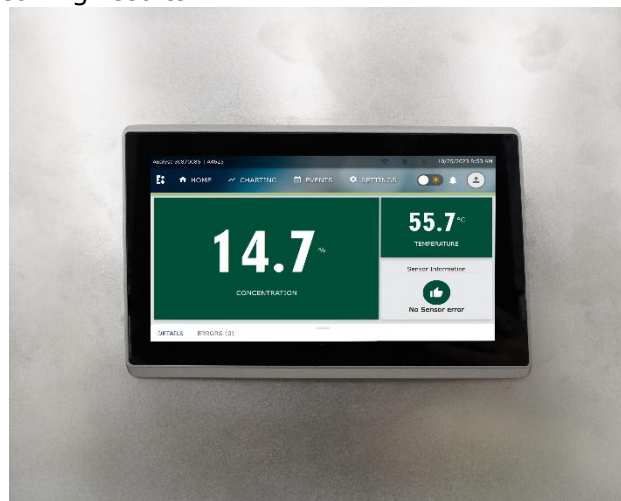

The ANALYST² delivers real-time, high-resolution concentration readings using cutting-edge sonic velocity technology. Unlike traditional instruments, it is unaffected by conductivity, color, or transparency, giving manufacturers precise measurements across a wide range of chemistries. With 0.1% resolution, the system provides actionable insights that allow for tighter process control and more consistent cleaning results.

"Our customers asked for a tool that could make process control faster, simpler, and more reliable—and that's exactly what the ANALYST² delivers," said Ram Wissel, Vice President, Global Technology, at KYZEN. "By combining precision measurement with real-time monitoring, this system reduces waste, saves time, and ensures cleaning processes meet the highest quality standards."

By accurately measuring concentrations, manufacturers can optimize chemical usage, minimize waste, and reduce the need for manual adjustments. With compatibility across over 60 cleaning solutions—including non-KYZEN chemistries—the ANALYST² integrates seamlessly into existing production lines while maximizing ROI.

By providing accurate, real-time data and actionable insights, the ANALYST² not only improves cleaning quality but also helps manufacturers increase throughput, reduce defects, and optimize overall operations. Its innovative design and technological advancements make it a standout solution for industries where cleanliness is critical, including electronics, aerospace, and medical devices.

Since 2005, the prestigious Global Technology Awards have recognized the absolute best new innovations in the printed circuit assembly and packaging industries. It brings together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward. About KYZEN

KYZEN is a global leader in providing environmentally responsible, RoHS compliant precision cleaning chemistries for industries ranging from electronics and advanced packaging to metal finishing and aerospace applications. Since its founding in 1990, KYZEN's innovative cleaning technologies, scientific expertise and customer support have been repeatedly recognized with the industry's most prestigious awards. For more information, visit www.kyzen.com.
