KYZEN to Showcase Process Reliability Solutions at SMTA International 2025

NASHVILLE — September 2025 — KYZEN, the global leader in innovative environmentally responsible cleaning chemistries, will exhibit in Booth 2427 at SMTA International 2025, taking place October 21–23 at the Donald E. Stephens Convention Center in Rosemont, Illinois.

This year's showcase will emphasize KYZEN's belief that true reliability comes from mastering the entire process—not just the chemistry. The KYZEN team will be discussing two game-changing solutions: the AQUANOX® A4618 cleaning agent and the KYZEN ANALYST² concentration monitoring system.

AQUANOX® A4618 is KYZEN's newest generation aqueous cleaning chemistry, developed to remove lead-free and no-clean flux residues from printed circuit assemblies with unmatched consistency. Its enhanced stabilizer package ensures bath longevity and performance, even in multi-pass cleaning environments. Built for high-reliability applications, A4618 helps manufacturers achieve cleaner boards, lower rework, and greater process stability.

The KYZEN ANALYST² takes process control to the next level. Using proprietary sonic velocity technology, it provides real-time, direct concentration measurements with 0.1% resolution—unaffected by factors like conductivity, color, or transparency. With more than 250 global installations, the ANALYST² has become the gold standard for precision monitoring, ensuring stability across diverse cleaning chemistries and production environments.

"KYZEN has always focused on delivering more than just chemistry—we deliver peace of mind," said Jayson Moy, Director of Global Product Management at KYZEN. "By combining A4618 with the ANALYST², manufacturers can achieve the performance they need today and the process reliability they'll depend on tomorrow."

For over 35 years, KYZEN has advanced cleaning science and process innovation, helping manufacturers around the world improve yield, consistency, and sustainability. Visitors to Booth 2427 at SMTA International will have the opportunity to meet with KYZEN experts and see firsthand how chemistry and intelligence work together to drive reliability in electronics manufacturing.

About KYZEN

KYZEN is a global leader in providing environmentally responsible, RoHS compliant precision cleaning chemistries for industries ranging from electronics and advanced packaging to metal finishing and aerospace applications. Since its founding in 1990, KYZEN's innovative cleaning technologies, scientific expertise and customer support have been repeatedly recognized with the industry's most prestigious awards.
