FOR IMMEDIATE RELEASE

Customers Call Kodiak Assembly's Electrical Testing and Inspection "Best-in-Class"

AUSTIN, TX — October 2025 — Kodiak Assembly Solutions LLLP, a leading electronics contract manufacturer, is earning strong feedback from new customers who say the company's electrical quality control and testing are "the best they've experienced."

Many of their recent customers have worked with other EMS providers before, but noted that Kodiak's consistency, precision, and attention to detail set it apart. From in-circuit and functional testing to thorough inspection and verification, every step of Kodiak's process is designed to ensure assemblies perform exactly as intended.

"The feedback we've received lately has been amazing," said John Kampfer, President, Kodiak Assembly Solutions. "When multiple customers tell us that our testing and electrical verification outshine what they've seen elsewhere, it shows that our focus on doing things right really matters."

Kodiak Assembly's advantage lies in its ability to combine compliance with advanced manufacturing capabilities. Its 60,000 sq. ft. Austin, Texas, facility houses automated SMT lines, in-house sourcing, test processes, system integration, and complete box-build assembly under one roof. The company's ISO 9001:2015 and ITAR registration helps support customers with demanding requirements across commercial, industrial, aerospace, and other complex markets.

Comprehensive testing options, including flying probe, X-ray, AOI, and functional testing, ensure that each build meets the highest reliability standards. Beyond its technical strength, Kodiak offers the flexibility needed for high-mix, low- to medium-volume projects, guiding customers from early prototypes through full production. Its engineering team provides DFM/DFT feedback and process optimization to reduce risk and shorten time-to-market for even the most complex assemblies.

As more OEMs seek dependable EMS partners, Kodiak Assembly continues to earn their trust, delivering precision, consistency, and quality that speaks for itself.
