

Master BGA Technology with TopLine's BGA Daisy Chain Test Vehicle

Milledgeville, Georgia, USA – TopLine Corporation announces the availability of new BGA Daisy Chain Test Vehicles designed to help engineers learn and understand necessary techniques for working with Ball Grid Array (BGA) components in Daisy Chain constructions.

Available in a range of body sizes and pitches, both SnPb and Lead-Free versions are available and are currently in stock for immediate shipping.

About TopLine

TopLine manufactures a wide range of solder columns for CCGA semiconductor packages, and provides Daisy Chain CCGA packages for engineering development, profiling and practice.

TopLine products provide hands-on learning for engineers. To learn more, visit www.TopLine.tv or call (1+) 800 – 776-9888.
