

FOR IMMEDIATE RELEASE

Syrma SGS Technology, Ltd to Accelerate AI-Driven Manufacturing with implementation of analytics and AI solution from Arch Systems in partnership with NMTronics India

PALO ALTO, Calif. September 2025 – Arch Systems, the leading provider of AI-powered data and analytics solutions for manufacturing operations, today announced a strategic partnership with NMTronics to implement next-generation AI-driven intelligence in all manufacturing sites of SyrmaSGS Technology Limited to boost productivity, improve quality, and reduce costs.

SyrmaSGS's adoption of Arch's AI-driven platform underscores Arch's role as a trusted partner to the world's top manufacturers. SyrmaSGS is deploying the Arch Platform across its facilities to provide production teams with real-time, AI-powered insights. Early results show higher line utilization, less downtime, and improved quality.

"Our partnership with NMTronics and Arch Systems brings AI-driven intelligence directly to our production lines, and will make all our manufacturing sites at par with Global EMS benchmarks," said Mr. JS Gujral, Co-Founder & Managing Director, SyrmaSGS Technology Limited. "Having real-time, prescriptive insights at the shopfloor level helps our teams act faster, improve equipment uptime, and deliver consistent quality across our facilities."

By uniting Arch's AI-driven manufacturing intelligence with NMTronics' India market leadership and local expertise, the partnership enables Indian manufacturers to achieve operational excellence without costly infrastructure overhauls.

"India's manufacturing growth is accelerating, and NMTronics is uniquely positioned to help customers adopt next-generation solutions," said Andrew Scheuermann, Co-Founder and CEO of Arch Systems. "Together, we can deliver measurable improvements in productivity, efficiency, and quality while driving down costs."

"Arch's AI-driven platform is a natural fit for our portfolio," said Soni Saran Singh, Founder, Managing Director & CEO of NMTronics India. "Combined with our nationwide presence and technical expertise, we can help customers increase output, reduce waste, and strengthen their competitive position."

Arch's Platform connects to virtually any shopfloor machine or system, unlocking data for real-time monitoring, advanced analytics, and prescriptive guidance. With Arch AI acting as an expert copilot, operators, engineers, and executives alike gain

insights that improve yield, optimize utilization, and enhance overall equipment effectiveness (OEE). *Together, Arch and NMTronics deliver the intelligence and support manufacturers need to compete in an increasingly data-driven global market.*

This collaboration marks another milestone in Arch Systems' global expansion strategy, underscoring its commitment to enabling manufacturers worldwide to achieve operational excellence through data and AI.

About Arch Systems

Arch Systems transforms factory intelligence with AI-driven solutions that help manufacturers optimize operations, reduce downtime, and maximize efficiency. Purpose-built for factories by manufacturing and data experts, Arch AI acts as an expert copilot, reading dashboards, synthesizing data, and delivering real-time, prescriptive guidance to operators, engineers, and executives without costly infrastructure overhauls.

About Syrma SGS Technology Ltd

Syrma SGS Technology Ltd is a leading electronics manufacturing services provider offering turnkey engineering and manufacturing solutions. Serving diverse sectors including automotive, healthcare, industrial appliances, IT, consumer products, and railways, Syrma operates multiple manufacturing facilities across India, with R&D centers in Chennai, Gurgaon, and Stuttgart, Germany.

About NMTronics India Pvt. Limited

NMTronics equips manufacturers, from innovative startups to Fortune 500 enterprises, with advanced capital equipment and technology. NMTronics provides a single-window solution, specializing in Surface Mount Technology (SMT), solar energy systems, EV solutions, and high-precision automation. NMTronics' integrated approach combines over 25 years of sales, service, and engineering, leveraging technology from over 40 global partners to deliver comprehensive solutions. NMTronics is your Partners in Technology.
