NSI Expands Bishop & Brogdon, Inc. Southeast Representative Partnership

Atlanta-Based Agency Has Been Representing NSI's Entire Portfolio of Brands in Georgia, Alabama, and the Florida Panhandle Territories; Expansion Now Includes the Entire State of Florida, Securing the Full Southeast U.S. Market

HUNTERSVILLE, N.C., May 1, 2026 – NSI is proud to announce that it has expanded their partnership with Atlanta-based Bishop & Brogdon, Inc. for the entire state of Florida, effective immediately. The agency has been representing NSI's entire portfolio of brands for more than 45 years in Georgia, Alabama, and the Florida panhandle.

“Bishop & Brogdon has consistently demonstrated remarkable growth year after year, and their ongoing investment in assembling a team of industry-leading experts has been truly remarkable,” said David Robbins, NSI Regional Vice President. “Their latest expansion into Florida is yet another testament to their dedication to delivering first-class service and support. This change allows us to enhance consistency, streamline our commitment to our strategic industry partners, and make it even easier for our colleagues and customers to work with us.”

Bishop & Brogdon's success has been directly correlated to their commitment in the electrical space, which is led by President Mark Bates' dedication to advancing collaboration across the industry. Bates recently served as Chairman of NEMRA where he was instrumental in helping implement a landmark Memorandum of Understanding that strengthened alignment between key industry sectors. His involvement in NECA and various other Electrical organizations further displays Bishop & Brogdon's dedication to the industry. Over the last several years, Bishop & Brogdon has consistently earned national awards from NSI, including the 2025 Strategic Initiative Champion.

“I am thankful for the opportunity to grow our partnership with NSI geographically, while servicing the Florida electrical market,” added Bates. “We are committed to supporting the Electrification of America and being the connective tissue for success. Today's industry requires strong strategic partnerships and we are excited to support those needs in the state of Florida.”

Founded in 1954 by William F. Bishop, Bishop & Brogdon is an electrical manufacturer's representative servicing three states across the Southeast. Its commitment to the electric industry

(more)

has provided opportunities to work on a national scale on key projects and leadership roles with national associations. Bishop & Brogdon is dedicated to developing a self-sustainable Florida division managed by Florida personnel, expanding its core principles across the southeast.
