FOR IMMEDIATE RELEASE

Naprotek and SemiGen to Showcase Vertically Integrated U.S. Manufacturing Capabilities at IMS 2025

SAN JOSE, Calif., May 2025 – Naprotek, LLC, a leading provider of mission-critical electronics technology solutions, announced today that it will exhibit alongside its RF/Microwave division, SemiGen, at the upcoming IEEE MTT-S International Microwave Symposium (IMS) from June 15-20, 2025 at the Moscone Center in San Francisco, CA. The companies will be located in Booth #1526.

At IMS 2025, Naprotek and SemiGen will spotlight their vertically integrated manufacturing solutions, designed to support complex, high-performance applications from the component level through full system integration. With operations located entirely within the United States, the companies offer a critical value proposition for customers navigating ITAR compliance and ongoing tariff challenges.

“We are proud to serve as a true extension of our customers’ manufacturing teams,” stated Teh-Kuang Lung, President and CEO of Naprotek. “As a U.S.-based company with vertically integrated capabilities, we are uniquely positioned to deliver trusted, agile, and secure solutions that meet the evolving demands of defense, aerospace, and other high-reliability markets.”

Tim Filteau, President of SemiGen, added: “Our goal at IMS is to showcase how our vertically integrated capabilities across PCBA and RF can help our customers implement their complex designs through mixed technology assemblies and testing capabilities, to accelerate innovation while eliminating logistical complexity. Whether customers need precision RF components or full box build services, we’re ready to support every stage of the product lifecycle—right here in the U.S.”

Visitors to Booth #1526 will have the opportunity to learn more about Naprotek and SemiGen’s advanced offerings, including RF/microwave component manufacturing, hybrid assembly, cleanroom capabilities, and full system integration, all housed within secure, ITAR-compliant facilities.
