PENANG, MALAYSIA – June 2026 – ViTrox, which aims to be the World’s Most Trusted Technology Company in providing innovative, advanced, and cost-effective automated Machine Vision Inspection Solutions for the semiconductor and electronics packaging industries, is pleased to announce its participation in the **Vietnam Industrial & Manufacturing Fair (VIMF) 2026**. The event will be held from **17 to 19 June 2026**, at the **WTC Expo International Exhibition Center** in Binh Duong, Vietnam. (**Booth #264**).

ViTrox is collaborating with **EMIN**, our trusted sales channel partner (SCP), to showcase the latest machine vision inspection and smart manufacturing solutions at **VIMF 2026**. This collaboration reflects our shared commitment to delivering innovative technologies and strengthening customer engagement across the region.

At this event, ViTrox will showcase its latest innovations of VisionXpert, specifically:

- [VisionXpert Smart Camera \(XC-330\)](#): A cutting-edge, **advanced vision system** engineered to automate vision inspection and ensure total traceability across the production floor. By combining a **high-resolution camera** with an **accelerated processor**, it delivers the computational power needed to minimise bottlenecks and increase production throughput. Equipped with a comprehensive library of over 130 tools and native deep learning, the system simplifies complex industrial inspection tasks with consistent reliability and precision.
- [VisionXpert Smart Code Reader \(XS-130\)](#): A high-performance scanning solution is designed to effortlessly handle a wide array of 1D and 2D codes with precision. It features a **5MP** sensor and **mechanical auto focus** for superior high-quality images at a distance of up to **2 meters**. Powered by a **deep learning algorithm**, it ensures rapid, dependable recognition of multiple codes even in challenging industrial environments.

In addition, the team will also demonstrate the advanced features of **V-Trace Solutions**, highlighting its capabilities in end-to-end inspection and traceability:

- **VisionSmartCheck**: An automated product verification solution that identifies defects to prevent them from moving downstream. The system utilises VisionXpert Smart Cameras and a V-ONE MARS IoT Edge Gateway to perform consistent digital inspection. It simplifies system integration by directly pushing smart camera data to a centralised V-Trace server via a high-integrity data pipeline, ensuring complete end-to-end traceability and data-backed warranty defence.
- **VisionSmartGuide**: A vision-powered solution that transforms manual work instructions into an automated, real-time guide. While operators manually perform the assembly workflow, it automatically executes verifications, such as checking for missed assemblies, component orientation, part correctness, and wiring, to ensure zero-error production..

Visitors are invited to visit ViTrox at **Booth #264** to explore live demonstrations of the VisionXpert and V-Trace Solutions and learn how its intelligent vision solutions can enhance manufacturing efficiency, accuracy, and process control.

About ViTrox Technologies

ViTrox is committed to being the World's Most Trusted Technology Company and the leading solutions provider through the most innovative, advanced, and cost-effective machine vision solution of excellent quality to its customers by integrating ViTrox's technologies, people, and strategic alliances.

ViTrox offers a full spectrum of solutions, ranging from [Middle & Back-end Semiconductor Inspection Solutions](#), [SMT PCB Assembly Vision Inspection Solutions](#), [Integrated Industrial Embedded Solutions](#), and [Manufacturing Intelligence Solutions Towards 5.0](#). ViTrox is headquartered in Penang, Malaysia, with regional offices in Asia, Germany, the United States, and is supported by a global network of sales and support sites.

For more information about ViTrox's products and services, please visit www.vitrox.com.
