**FOR IMMEDIATE RELEASE**

# RBB Earns AS9100 Certification, Expands Aerospace and Defense Credentials

**WOOSTER, OH — May 2026 —** RBB, a trusted leader in electronics manufacturing since 1973, has achieved AS9100 certification, meeting the stringent quality, traceability, and risk management standards required in aerospace and defense industries.

AS9100 builds on the widely recognized ISO 9001 standard, adding strict requirements to address safety, reliability, and regulatory compliance specific to aerospace and defense applications. This certification demonstrates that RBB’s processes consistently deliver the high level of quality these industries demand.

“Achieving AS9100 reflects the standards our teams follow every day,” said Bruce Hendrick, Owner & CEO of RBB. “It’s a recognition of our capabilities and the reliability our clients can expect from every product we deliver.”

RBB specializes in low- to mid-volume production, supporting complex electronic assemblies across a wide range of industries. The company offers flexible engagement models, from prototypes and short runs to long-term production programs, covering both turnkey and consignment projects. Its capabilities include surface mount (SMT) and through-hole assembly, with particular expertise in mixed-technology builds.

In addition to PCB assembly, RBB operates a UL 508A certified panel shop, providing electromechanical integration and control solutions that complement its board-level manufacturing. Advanced process controls, thorough testing, and collaborative engineering ensure every assembly meets high standards of quality and performance.
