FOR IMMEDIATE RELEASE

RBB to Exhibit at PCB East 2026, Showcasing Flexible Electronics Manufacturing Solutions

WOOSTER, OH — April 2026 — RBB, a trusted leader in electronics manufacturing since 1973, will exhibit at PCB East 2026 on Wednesday, April 29, 2026, at the DCU Convention Center, inviting attendees to explore how its flexible manufacturing approach supports complex electronic assembly across industries.

Specializing in low- to mid-volume production, RBB delivers precision and reliability for everything from new product introductions to long-term legacy product support. The company's expertise spans surface mount (SMT) and through-hole assembly, with a strong track record in mixed-technology builds. RBB supports both turnkey and consignment projects, tailoring production to the unique needs of each customer, whether for prototypes, short runs, or ongoing programs.

Beyond PCB assembly, RBB operates a UL 508A certified panel shop, offering full electromechanical integration and control solutions. With rigorous testing, advanced process controls, and hands-on engineering support, RBB ensures every build meets the highest standards of quality and performance.

"PCB East is an opportunity to show how RBB's flexible manufacturing and engineering expertise can help customers solve complex challenges and bring products to market faster," said Carrie Guenther Sales & Marketing Manager.
