FOR IMMEDIATE RELEASE

RBB to Showcase Flexible Assembly Solutions at Two SMTA Expos in August

WOOSTER, OH — July 2026 — RBB, a trusted leader in electronics manufacturing since 1973, will exhibit at two upcoming SMTA regional events this August: the Michigan Expo & Tech Forum on August 18, 2026, and the Ohio Valley Expo & Tech Forum on August 20, 2026.

The Michigan Expo will take place at Laurel Manor in Livonia, MI, followed by the Ohio Valley Expo at the Embassy Suites by Hilton Cleveland-Rockside in Independence, OH. Both events run from 8:30 a.m. to mid-afternoon and bring together electronics manufacturing professionals for technical exchange, supplier interaction, and networking.

RBB's team will be on site at both events to discuss how it supports customers' assembly needs across a range of programs and production requirements.

The company has built its reputation around steady, reliable electronics manufacturing, particularly for programs that don't fit neatly into high-volume production models. RBB focuses on low- to mid-volume builds, supporting everything from early-stage prototypes to long-running products that require consistent quality and attention.

Its capabilities include both surface mount and through-hole PCB assembly, as well as mixed-technology builds that require a more hands-on approach. RBB works with customers on both turnkey and consignment programs, adapting to the specific needs of each project.

In addition to PCB assembly, RBB operates a UL 508A-certified panel shop, providing system integration and control panel builds. With in-house testing and close engineering involvement, the company supports projects that extend beyond the board level.

Attendees are encouraged to stop by and connect with the RBB team during the events to learn more about its approach to flexible, customer-focused manufacturing.
