Smartsol Technologies Mexico Strengthens its X-ray Division and Announces Strategic Partnership Expansion with Creative Electron

GUADALAJARA, Mexico – Jun 6, 2026

Smartsol Technologies Mexico, a leader in comprehensive solutions for the electronics manufacturing industry, today announces a strategic evolution of its inspection portfolio. With the goal of reaffirming its commitment to technological innovation and the operational stability of its customers, the company has decided to focus its **X-ray inspection** efforts exclusively through the expansion of its partnership with **Creative Electron**.

After a period of collaboration with Nordson Test & Inspection, Smartsol is concluding that stage to make way for a more agile solution structure, aligned with **the values of loyalty and continuity** that define the company. This transition allows Smartsol to guarantee that its customers throughout Mexico receive the most advanced and personalized support in non-destructive inspection technology.

"At Smartsol, we deeply value the permanence of our product lines and honor the loyalty toward our customers and the people who, through teamwork, have built what we are today," said **Ivan Romo, Director of Smartsol Technologies**. "We are excited to extend our business relationship with Creative Electron for their X-ray solutions across Mexico for our electronics manufacturing customers. We thank **Bill Cardoso and Giancarlo de la Garza**

for the trust and friendship of so many years, which allows us to continue being number one in the market."

The expansion of this agreement ensures that electronics manufacturers in Mexico have direct access to **Creative Electron's X-ray systems**, recognized for their **innovation in artificial intelligence and technical precision**, backed by Smartsol's elite engineering and technical service team. With this announcement, Smartsol reaffirms its mission to offer only best-in-class solutions, prioritizing long-term relationships and excellence in after-sales service.
