Transition Automation Ships Largest Single Order in Company History

Tyngsboro, Massachusetts, USA, April 29, 2025—

Transition Automation, Inc. recently shipped the largest single order for Permaflex Edge Metal Squeegees. The international order shipped to a large multinational packaging company located in India. The Permaflex products specified by this order will

be used in a Security Device application for protecting international products from counterfeiting.

“This order follows a trend we are seeing over the last two years – where Permalex blades are implemented factory-wide, rather than just for high difficulty production,” said Company President Mark Curtin. “Higher level managers are discovering lost efficiency with tooling maintenance, repeat purchasing cycles and frequent machine interruption. Permalex squeegees are a direct answer to these issues with their long duty cycle, which often exceeds 12 months of continuous use.”

Transition Automation, Inc. is the only company with a singular focus on high performance metal squeegee blades and holder systems. Permalex brand squeegees are used by many top tier electronics manufacturers – especially those who supply to high value, mission critical end-markets, such as space and satellite, automotive, avionics and industrial controls. Transition Automation, Inc. is located at 5 Trader Circle, Building D, Tyngsboro, Ma, 01879 USA; Phone: 978-649-2400, E-mail: sales@Transitionautomation.com; Web: www.metalsqueegees.com
