

GLOBAL PRESS RELEASE

FOR IMMEDIATE USE

5th June 26

Connecting Electronics with Power, Mobility, and Future Energy Systems: Thailand Electronics Circuit Asia 2026

Taking place on **26–28 August 2026** at BITEC, Bangkok, THECA 2026 will bring together **over 300 exhibitors and 7,000+ professionals from more than 40 countries**, positioning itself as one of Southeast Asia's fastest-growing industry platforms.

Where Electronics Meets Power & Energy Applications

Unlike many conventional electronics exhibitions and conferences, THECA 2026 reflects a broader industrial reality, where **electronics, power systems, and energy technologies are increasingly interconnected**.

The event covers the full value chain:

- Semiconductor and Advanced Packaging
- PCB manufacture and high-reliability circuit design
- PCB assembly (PCBA) and EMS for industrial and advanced applications
- Automation, control systems, and intelligent manufacturing
- Power electronics and advanced components

For visitors, this offers a unique perspective on how **core electronics technologies are enabling next-generation infrastructure**.

Power2Motion: Electronics Driving E-Mobility and Energy Systems

A key highlight of THECA 2026 is the **Power2Motion zone**, focusing on the integration of electronics in mobility and energy systems.

The zone features innovations in:

- Electric vehicle (EV) systems and powertrain electronics
- Battery technologies and energy storage systems
- Power conversion and thermal management
- Smart connectivity, sensors, and control systems

Why Industry Professionals Should Attend

- Explore suppliers for power electronics, control systems, and industrial applications
- Connect with manufacturers, OEMs, and system integrators across Asia
- Gain insight into EV, smart grid, and energy storage developments
- Identify new opportunities in Southeast Asia's fast-growing industrial ecosystem

A Strategic Gateway to Asia's Industrial Future

As the boundaries between electronics, power systems, and energy technologies continue to converge, industry players must adapt quickly to remain competitive.

THECA 2026 provides an ideal platform, not only to observe these changes but to be part of them.
