

FOR IMMEDIATE RELEASE

Wiwynn selects TRI as Inspection Partner for Advanced Server Board Manufacturing

[Taipei, Taiwan – May 28, 2026] Test Research, Inc. (TRI) (TWSE: 3030), the leading test and inspection systems provider for the electronics manufacturing industry, is proud to announce its selection by Wiwynn as a trusted equipment vendor for [server board inspection](#). TRI congratulates Wiwynn on its recent business success and the major expansion of its Tainan manufacturing facility to meet growing global demands.

The collaboration focuses on high-throughput server board manufacturing, a sector requiring the highest levels of quality and defect detection. TRI's advanced inspection solutions ensure high precision and stability for complex server printed circuit board assemblies (PCBAs), optimizing production line yields and minimizing downtime.

Equipped with cutting-edge software and robust mechanical platforms, TRI's smart factory solutions deliver comprehensive inspection coverage tailored for the demanding telecommunication and server industries. This partnership reinforces TRI's commitment to supporting industry leaders with world-class test and inspection technology.
