

## **Mobile Dust Collectors Introduced for Short-term Rental, Testing**

Owosso, MI. January 9, 2026. Tri-Mer Corporation, manufacturer of wet and dry dust collection systems for industrial use, has introduced a flexible, cost-effective rental program for short-term production and research.

Skid-mounted dust collectors are easy to set-up and are supplied throughout the continental US and Canada in multiple capacity ranges. Most notably, their unique design prevents conflagration at the source, so systems are ideal for applications involving volatile dusts and/or high dust loadings.

Tri-Mer rental units use time-proven Whirl/Wet collection technology and are effective for powdered, flaked and granulated product, and both soluble and insoluble particulate.

Whirl/Wet is manufactured in 100% polypropylene and steel alloys; systems operate in processing facilities throughout the Americas, Europe and Asia. It is used to collect dusts from snack food and cereal manufacturing and spice blending, by manufacturers of pharmaceuticals, cosmetics and metal products, and for battery propagation testing. These systems are also used in conjunction with pneumatic conveyors, and in packaging operations.

Rental systems from Tri-Mer provide consistent 95-99% collection efficiency, and can be specified for manual or semi-automatic operation. Energy generated inside the unit will not allow the system to clog under any operating conditions, therefore, the agglomeration and sticky residues that are commonplace with traditional dust collectors are not an issue.

The system is also unique in that it does not use "high-maintenance" wear parts such as spray nozzles, pumps and dust bags - or air compressors.

Whirl/Wet dust collectors have no internal moving parts, are energy-efficient, and have a CIP/self-cleaning design. Water use is low: following initial charge, water additions are only needed to compensate for evaporation and drag-out.

Tri-Mer Corporation manufactures all of its dust collectors in the USA. For more information on short-term rental and rent-to-purchase options, contact: (989) 723-7838 or [salesdpt@tri-mer.com](mailto:salesdpt@tri-mer.com) [www.tri-mer.com](http://www.tri-mer.com)
