ViTrox Americas Welcomes Huy Pham as Technical Support Engineer

PENANG, MALAYSIA – July 2026 – ViTrox Americas is pleased to announce the appointment of Huy Pham as Technical Support Engineer, strengthening the company's commitment to delivering world-class service and technical expertise to customers throughout North America.

In his new role, Pham will provide technical support, troubleshooting, training, and applications assistance for ViTrox's industry-leading inspection and manufacturing intelligence solutions. He will work closely with customers to optimize equipment performance, improve production efficiency, and support successful implementation of ViTrox technologies across a wide range of electronics manufacturing environments.

Pham brings more than a decade of experience in electronics manufacturing, process engineering, inspection technologies, and production support. His background includes extensive work with SMT manufacturing processes, automated optical inspection (AOI), automated x-ray inspection (AXI), soldering technologies, process optimization, and advanced manufacturing equipment.

Most recently, Pham served as Senior Process Engineering Technician at Creation Technologies, where he supported process validation, technical documentation, training initiatives, and cross-functional process improvement programs. Prior to that, he held several engineering and technical leadership positions at Flex, where he gained hands-on experience programming and troubleshooting advanced inspection systems, including ViTrox platforms.

“Huy’s technical expertise, customer-focused mindset, and extensive experience in electronics manufacturing make him a valuable addition to our team,” said Sy Creed, Director of Business Development, ViTrox Americas. “His knowledge of inspection technologies and manufacturing processes will help us continue delivering the high level of support and service our customers expect from ViTrox.”

ViTrox Americas continues to expand its regional support capabilities as demand grows for advanced inspection, automation, and manufacturing intelligence solutions across the electronics manufacturing industry.
