

Weller Tools Brings the Full Soldering Workbench to Booth 3516 at APEX 2026

Besigheim – February 2026 – Weller Tools, the industry leader in hand soldering solutions, will exhibit at the 2026 APEX EXPO, taking place March 17–19 at the Anaheim Convention Center. The company will demonstrate how its connected ecosystem supports production, R&D, and rework environments from a single workbench in Booth 3516.

At APEX, Weller will highlight a complete range of soldering stations, smart tools, fume extraction, and precision hand tools designed to work together seamlessly. The display centers on three core workbench environments—production, R&D, and rework—giving attendees a practical look at how Weller solutions scale across different applications and process requirements.

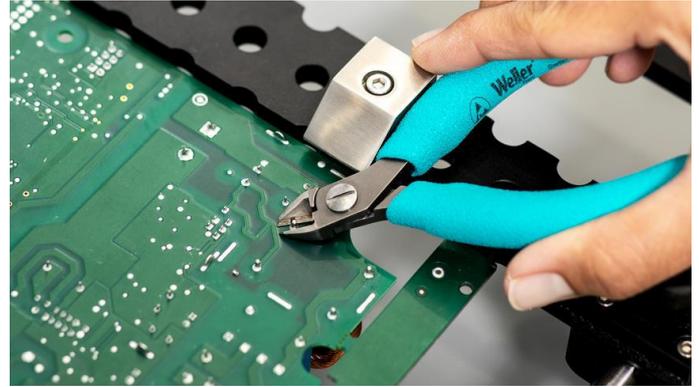

A key focus of the exhibit will be Weller's WXsmart platform, which brings connectivity, traceability, and Total Process Control to hand soldering operations. WXsmart will be shown alongside the WX2N and WT Performance Line stations, offering flexible options for both high-end and mid-range applications. Visitors will also see Weller's portfolio of smart soldering irons and tips, ZeroSmog fume extraction systems, and precision tools from Weller Erem and Xcelite.

"APEX is where manufacturers come to see how real work gets done," said Marcel Teller Sr. Director, Marketing & R&D, SBU Lead Weller. "Our goal is to show how a well-designed soldering bench—one that

connects tools, process control, and operator safety—can make day-to-day work more consistent and efficient.”

Health and safety will also be featured prominently, with live demonstrations of ZeroSmog fume extraction solutions designed to protect operators without disrupting workflow. Together with Weller’s precision cutters, pliers, tweezers, and accessories, the exhibit reinforces Weller’s role as a single source for professional soldering workbenches.

Attendees are invited to visit Booth 3516 to explore the Weller ecosystem in person and speak with Weller experts about building soldering solutions tailored to their specific applications.

About Weller Tools

The Weller name stands for pioneering solutions on and around the soldering bench. Founded in 1945, the company quickly grew to become the market leader in its segment. Weller's extensive range of products includes innovative solutions for industry and trade. The company's areas of expertise include conventional soldering technology, extraction systems, precision tools as well as many other benchtop products and services.
